

We're painting
the town **green.**

Going green is a great idea.

The question is: Where to start?
NC Public Power has an answer:
Right here in your own hometown.

Hometown Green

Generating Smart Energy Choices

Our Hometown Green program is our commitment to you and your community — bringing smart energy choices closer to home. Local energy fairs. Education programs. Energy savings kits. And lots more. Learn how you can make small energy-saving choices at home. And while they may be small changes, when everybody in town is making them, they can make a big difference. You'll save money and feel good about doing it.
